

giroflex 656

giroflex
designed to work

‘ Above all a perfect chair must be as flexible as its occupant and supportive at all times. Precisely this was crucial for the design of the giroflex 656. ’

*Carmen and Urs Greutmann,
Greutmann Bolzern Designstudio, Zurich*

LOOKS BRILLIANT, IS EXTREMELY FLEXIBLE AND SETS NEW STANDARDS.

With the giroflex 656 chair family, Switzerland's seating centre of excellence presents the perfect synthesis of design and comfort. A groundbreaking concept that combines aesthetics with high technology.

Whether flexible swivel chair, practical conference chair or welcoming visitor's chair: giroflex 656 is distinguished by its light, delicate, yet striking design and its extreme ease of use.

Thanks to its calm appearance, the wide variety of feature options and the many colours to choose from, giroflex 656 goes with any room concept. First-class Swiss manufacturing quality and premium components make it a long-lasting, sturdy companion.

The new Shiftmove synchronized mechanism, which can be instantly adjusted in eight stages to body weights from 45 to 150 kg, provides consistently even back tilt resistance with maximum freedom of movement. In addition, the height- and depth-adjustable lumbar support ensures optimum posture.

SWIVEL CHAIR

THOSE WHO WORK HARD SHOULD HAVE IT EASY. IN ANY POSITION.

giroflex 656 – Swivel chair: Available as a swivel work chair in various backrest heights and seat widths, with innovative lumbar support. Either with 3-D or fixed armrests. With leather or fabric cover in various colours or with black 3-D knitted fabric. All models with castors for soft or hard floors. Aluminium 5-star base, either polished or epoxy-coated.

Giving our best since 1872. So every detail is perfect.

When you're sitting properly, you feel better, you're more motivated and you get more done. In its own research and development department in Koblenz, Switzerland, Giroflex develops defining concepts that actively support sitting. Every single seat is characterized by innovation, functionality and aesthetics, and proves how profoundly familiar Giroflex is with ergonomics and work physiology.

For consistently even back tilt resistance: the new Shiftmove synchronized mechanism for seat occupants from 45 to 120 kg or optionally to 150 kg.

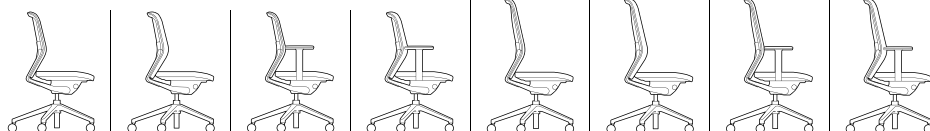

The new height- and depth-adjustable lumbar support ensures maximum seating comfort.

No matter how heavy its occupant is: the new Shiftmove synchronized mechanism makes it easy. In an instant the back tilt resistance can be adjusted to the individual weight in eight stages by means of a rotary knob – from 45 to 120 kg or optionally to 150 kg. The Shiftmove synchronized mechanism supports the pelvis and back at all times and offers maximum flexibility.

So everyone from the smallest to the largest occupant feels comfortable, the height and depth of the lumbar support can be adjusted to suit the individual's body. The pressure in the lumbar region is always pleasantly even, and ensures optimum comfort in any sitting position.

giroflex 656 – Conference chair: Available with leather or fabric cover in various colours or with black 3-D knitted fabric. With 4-star base and glides or castors, aluminium base polished or epoxy-coated, and with or without armrests.

giroflex 656 – Visitor's chair: It's as light as it looks and finds favour as a small group in the reception or waiting room. The giroflex 656 visitor's chair is available as a cantilever or a stackable 4-legged chair with rectangular tubing. Both delicate and robust in design, it has everything needed to allow convenient, comfortable sitting.

giroflex 656 – Conference chair: Thanks to impressive design with perfect proportions and a range of different versions, the giroflex 656 conference chair is welcome everywhere – in the meeting room, the seminar room or the conference area. Designed for active sitting, it helps handle even the longest meeting comfortably.

With 'Cradle to Cradle' Giroflex brings together what belongs together: quality, design and ecology.

Anyone who works sitting down should be able to have the confidence that his or her chair is free of harmful substances. This is one of the reasons sustainability has been a part of everything we do at Giroflex for decades and is constantly being expanded.

'Cradle to Cradle': giroflex 656 shows how it's done. The new 656 generation shows how important the clever, careful and economical use of resources is for Giroflex: with the label 'Cradle to Cradle' all models comply with stringent conditions – from material purchasing, development and production to recycling. So their components flow almost 100% back into the production cycle.

Many steps, clear goals: a tradition of ecology. Mono-material separation, the first fully recyclable model range in Europe and the environmental standard ISO 14001: Giroflex has been a pioneer in office ecology since the 80s. New facilities and targeted measures have resulted in massive savings in CO₂, water, electricity and gas. Short distances need less fuel: nearly everything is produced in-house or nearby. In addition, Giroflex disposes of office chairs properly and if requested supplies its products with the 'climate-neutral' label. And finally, suppliers are also rigorously checked.

Swiss made: Swiss quality is worth it!

Since 1872, Giroflex has been producing in Switzerland, in Koblenz, with the highest standards of quality and ecology. This will remain so in future too. Because the concentration of the core competencies of research, development and production with qualified staff in one place is worth it.

5-year guarantee: Giroflex provides a 5-year full warranty on its quality products covering construction, mechanism and workmanship.

Services: We clean, repair and maintain office chairs on your premises or ours, analyse your seating furniture, advise you free of charge and ecologically dispose of office chairs of all brands.
