

Professional partnership for perfect solutions

Weidmüller – This name stands for highly sophisticated know-how in electrical connection technology. In order to successfully compete within chosen markets and to meet the growing demands of customers, you need a partner to rely on. A partner who is dedicated and has the relevant know-how to solve issues with you. As a leading manufacturer of connection components for transmitting energy, signals and data, we are completely dedicated to our customers requirement during the development of our innovative products. Our corporate focus is customer orientated.

As an OEM-provider, Weidmüller sets the worldwide standard in electrical connection technology. Our manufacturing competence in fine mechanics leads the field. The Weidmüller group offers a product portfolio which is customer and market orientated and closely matches the needs of the industrial, process and transport sectors. The individual problems of our customers are crucial for driving the thoughts and actions within our company.

The Weidmüller group is internationally oriented and oversees its own production plants, sales departments and agencies in more than seventy countries. Our commitment towards quality and service make Weidmüller a competent and flexible worldwide partner for its customers.

**We can offer a lot:
follow us and discover the world of connection technology!**

The world of connection technology

The world of connection technology can be discovered between control systems and sensors. All kinds of functions can be efficiently and dependably implemented in this sphere. Weidmüller is perfectly at home in this world.

Modular Terminal Blocks

4

Terminal blocks connect and give structure to connections between the control cabinet and the sensor/actuator level. Weidmüller offers a comprehensive portfolio, with a variety of connection types and extensive range of accessories.

PCB Components

5

PCB components secure the connection between the outer world and printed circuit boards found on electrical devices and controllers. Weidmüller's product line extends to PCB terminals, PCB connectors and electronics housings.

Electronics

6

The Electronics product portfolio includes a well-coordinated line of surge protection, one- and three-phase power supplies, signal conditioners and isolators, relays, optos, and process-automation products.

Industrial Ethernet

7

The Industrial Ethernet product portfolio includes passive and active components for building a reliable network infrastructure. Products such as IP20-protection components for the control cabinet are offered, as well as IP67 products for industrial environments.

Enclosures and Cable Glands

8

Plastic, die-cast aluminium or stainless steel enclosures are designed to protect electrical equipment. Weidmüller offers a full custom assemble service to meet its customers hazardous or safe area needs.

RockStar®

9

The heavy-duty connectors from Weidmüller stand out with their innovative details. These features eliminate the need for a special series of housings for corrosive environments. The housings are offered with IP65- or IP69k-protection. The RockStar® range is among the most comprehensive product-lines on the market.

Sensor Actuator Interface

10

SAI distributors with IP67-protection bring together sensor and actuator signals on-site. Weidmüller offers both passive and active distributors for standardised Fieldbus systems and Industrial Ethernet. The range also includes JACKPAC® (IP67 signal box) and cables.

FIELDPOWER®

11

FieldPower® is the flexible, cost-effective solution for decentralised power distribution within mechanical and system production facilities. FieldPower® includes PowerBox distributor boxes, maintenance switches, plugs, fuse plugs, pre-assembled cable sets, seals and many accessories.

Tools

12

Weidmüller delivers professional high-quality hand tools for cutting, stripping, crimping, screwing, measuring and testing. Tool sets and an automatic machine series are also found in this product range.

Marking Systems

13

Weidmüller offers a wide range of products for the production and application of electrical equipment identification, for the marking of devices, wires and connectors. This includes installation material such as labels, shrink sleeves, and cable ties.

Customer-specific assembly

14

Weidmüller's customised production includes assembly of mounting rails, processing, coating and equipping of enclosures, and a marking service that includes engraving enclosure legend plates.

OEM

16

Weidmüller's global OEM partnership: the perfect solution for individual customers. Our OEM department offers a "tailor-made fit" for connection and enclosure technology.

Certifications

18

Our certifications ensure quality – both in the process and in the product. Weidmüller's quality management is based on ISO 9000 ff.

Worldwide activities

20

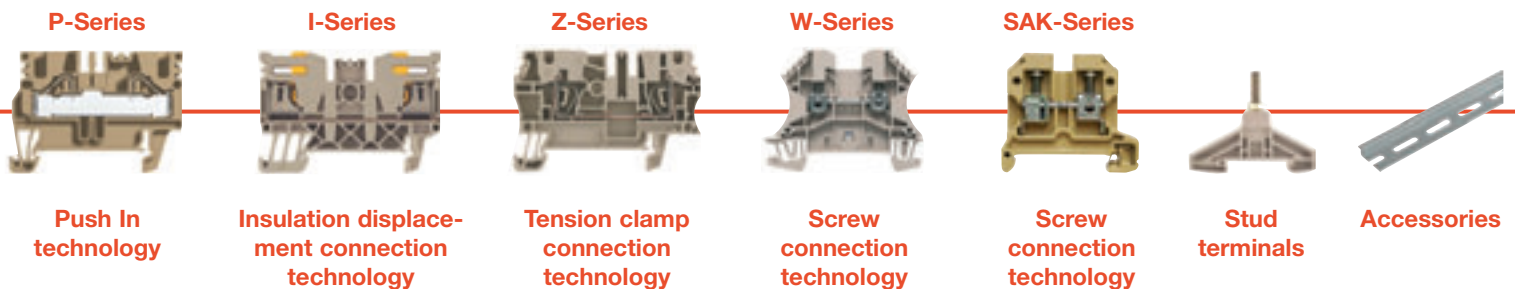

Modular Terminal Blocks – for all applications

The connection of components used in the energy and control market segments becomes increasingly complex as changes in size (downwards) and functionality of the components increases upwards. Weidmüller can offer a comprehensive range of solutions:

- **P-Series: Push In technology** – clamping range from 0.13 mm² to 16 mm²
- **I-Series: Insulation-displacement technology** – clamping range from 0.21 mm² to 2.5 mm²
- **Z-Series: Tension-clamp technology** – clamping range from 0.08 mm² to 35 mm²
- **W-Series: Screw-connection technology** – clamping range from 0.05 mm² to 300 mm²

The advantages of all product series:

- Small size
- Vibration-resistant, maintenance-free connections
- Distribution of potentials possible via pluggable cross-connections
- A complete and comprehensive line of accessories
- A large and clear area for labelling and identification
- Comprehensive international approvals

Achieve a new degree of freedom with our PCB components

The PCB component range consists of PCB terminals, PCB connectors and electronics housings.

- **PCB terminals in pitches from 3.5 mm to 15 mm, rated up to 1000 V / 101 A (IEC)**
- **PCB connectors in pitches from 3.5 mm to 10.16 mm, rated up to 1000 V / 76 A (IEC)**
- **Electronic housings for installation, construction and field use. With IP20- and IP68-protection.**

The user has total control over the pitch dimensions, soldering process, or connection technique. All connections feature total contact reliability, are maintenance-free, and are easy to use – whether they are screw, tension-clamp, insulation-displacement, Push In, crimp, or push-on tab.

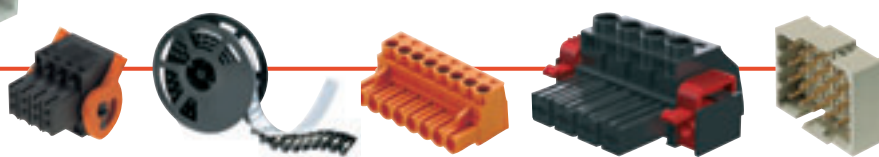

Weidmüller's automation solutions enable you to connect the PCB and terminal together in one step during SMD assembly: Innovative through-hole-reflow technology is integrated into our terminals and pin headers. This enables a cost reduction of up to 30 %.

Custom component housings are available, custom-made for your electronics, for use in installation, construction or IP68 enclosures. Proven connection technology runs throughout the product program.

Reliable and safe – switchgear cabinet Electronics from Weidmüller

Industrial electronics demands a very high quality level. Weidmüller electronics products are not only high-quality, they also are developed under state-of-the-art standards. Thus they are highly reliable and ready to use world-wide. Their future is assured.

Weidmüller **power supplies** are ideally suited for use in industrial applications. Where lightning strikes cause large increases in potentials, the use of effective **surge protection** is a must. Weidmüller offers a comprehensive assortment of **analogue electronic components** for installation in the main- or sub-distribution systems, and also for individual device protection. These products are presented in three series. MANN-series, with rail mounting or front panel displays, are designed for the high-stress conditions of process automation. WAVESERIES, with its modular construction, is an extremely robust family of signal conditioners. Signal conditioners and isolators in the MICROSERIES are notable in that they can be assembled very densely together – with a width of only 6 mm. Weidmüller's assortment of **relays and optos** are used for industry-automation applications for the separation and coupling of digital I/O signals. They are well suited for use in sub-distributors and switchgear cabinets, thanks to their thin design.

JACKPAC®

Interface units

Digital signalling

Analogue signal conditioning

Surge protection

Power supplies

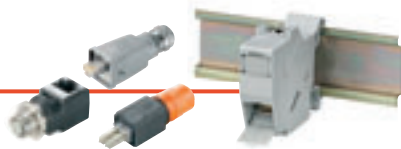

Components for network infrastructure

Weidmüller's competence with network infrastructures is proven by this line of Industrial Ethernet components. We are the one source that offers you components from controllers to the field level. That includes **passive** electro-mechanical products such as **plugs, wires, connection elements** and **outlets** – and also **active** components such as **switches** and **routers** for the standardised operation of a service-independent network infrastructure. Weidmüller makes it possible for IT administrators to equip and activate their network with integrated and universal methods.

The Industrial Ethernet components from Weidmüller are elements which connect Ethernet-capable devices of varying manufacturers and differing applications. Weidmüller offers an appealing array of components for Ethernet infrastructures, with universal cat.6 cabling, copper and fibre-optic cables, as well as user-assembled connectors and connection elements. These components can be used in the switch-gear cabinet (**IP20**), or also in the harsher industry environment (up to **IP67**).

Active components

Passive components

Accessories

Individual services offered – enclosures and cable entry systems

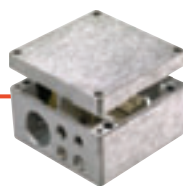

The **Klippon®** brand has long stood for competence and quality in enclosures – in particular with customer solutions for industrial standard applications and for applications in harsh environments. Weidmüller meets these demands with its new edition of **stainless steel enclosures** – the Klippon® TB series, and with its enhanced **aluminium enclosures** – the Klippon® K series. The portfolio is complemented by the Klippon® POK series of **glass reinforced polyester enclosures** and also by a range of industrial **polycarbonate enclosures**.

No matter what application is being planned for, Weidmüller can offer the correct enclosure design to fit your needs. Weidmüller customers receive individualised service: customised enclosures with customer-specified configurations, such as rail mounting, drilling, cable glands, cut-outs, special coatings, and much more.

To compliment the enclosure ranges, Weidmüller has a variety of different **cable and wire entry systems** in the portfolio, with different designs of plastic, brass and stainless steel cable glands in the IP66, 67, 68 or IP69k protection classes. As an alternative to cable glands, pre-assembled lines with modular multi-wire or multi-cable entry systems can be simply and quickly inserted into electrical equipment. Last but not least, Weidmüller offer many **EX-certified** components for use within hazardous environments.

RockStar® – the new dimension

As the leading manufacturer of electrical connection components, Weidmüller offers the best quality and innovative practical solutions. Weidmüller's heavy-duty RockStar® connector is a convincing force down to its smallest details. RockStar® sets the dimensions for future standards. What other suppliers offer only as a custom configuration, Weidmüller supplies in its standard product line. The selection of an appropriate RockStar® connector which meets customer requirements is made simple with this broad spectrum of products. So the customer saves time and money – and the work flow is optimised. Durable products and standards ensure us of an advantage over our competitors. The RockStar® advantages at a glance:

- **One of the most comprehensive line of products on the market**
- **Connector varieties for all sorts of industry applications and fields**
- **Individual industry solutions**
- **World-wide accessibility**
- **Comprehensive customer service**

RockStar® strongly carries forward with Weidmüller's successful product strategy: a one-stop shop, with all products perfectly coordinated to fit together – from terminal blocks and Industrial Ethernet components, to new connectors.

Sensor Actuator Interface – the decentralised solution

SAI distributors from Weidmüller provide the perfect solution for decentralised distribution: they are dust-protected, waterproof, sturdy, safe and designed for the future. SAI distributors with IP67-protection bring together signals on-site. **Passive** distributors are available, as are distributors designed as **active Fieldbus I/Os**.

The SAI Active Universal family distinguishes itself with an expanded diagnosis capability and configurable I/Os. The Fieldbus modules for PB-DP, DeviceNet™, CANopen, Industrial Ethernet and the AS interface all support the objective of consistent, modular industrial automation. The **SAI-PRO sub-bus system** sharply increases the signal processing capabilities of each Fieldbus node. Up to fifteen extension modules can be connected to the sub-bus (max. 50 m) with commercially-available shielded sensor cable. The **AS Interface Bus** provides a simple and inexpensive connection for sensors and actuators. The **Line Modules** are designed particularly small and thin. The signal and current supply lines can be connected without additional accessories.

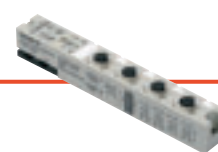

The FBCon Fieldbus distributor enables the corresponding field device to be directly coupled to the Fieldbus or Profibus PA. They can be used in industry applications and also in the EEx (ia) sector. The product range includes 1-, 2-, 4- and 8-way distributors in aluminium and stainless steel housing.

SAI Passive

SAI Active

SAI-AS Interface

FIELDPOWER® - decentralised power distribution

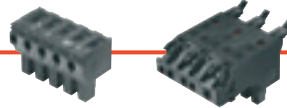

FieldPower® is the flexible, economic solution for decentralised power distribution in mechanical and plant engineering, at airports, in intra-logistics, motorcar production and anywhere there is a need to distribute power over long distances. The innovative solution includes PowerBox distribution boxes, maintenance switches, plug-in connectors (optionally with fuse function), prefabricated cable sets and a full range of accessories.

The power is distributed via an uncut round or flat cable. The pick-off is done at any suitable position close to the consuming device using the PowerBox with IDC technology. Branches and outgoing feeders to starters and frequency inverters are realised as “pluggable” or “fixed”. This reduces the length of cable runs and shortens installation time. FieldPower® reduces the overall costs of the project and increases flexibility for extending the plant or in the event of subsequent redesigns. The benefits are:

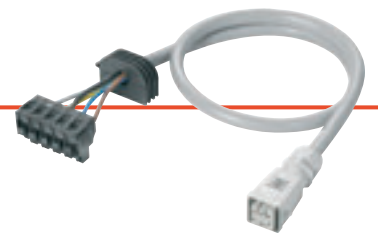

- **All-in-one – the PowerBox for universal application as feeder, extension and as two-way T-output**
- **Prefabricated cables or fabrication on the spot**
- **Current-carrying capacity up to 41 A in branches or outgoing and feed circuits**
- **Construction of line, tree and network structures**

Power distribution IP65 / IP30

Cable assemblies

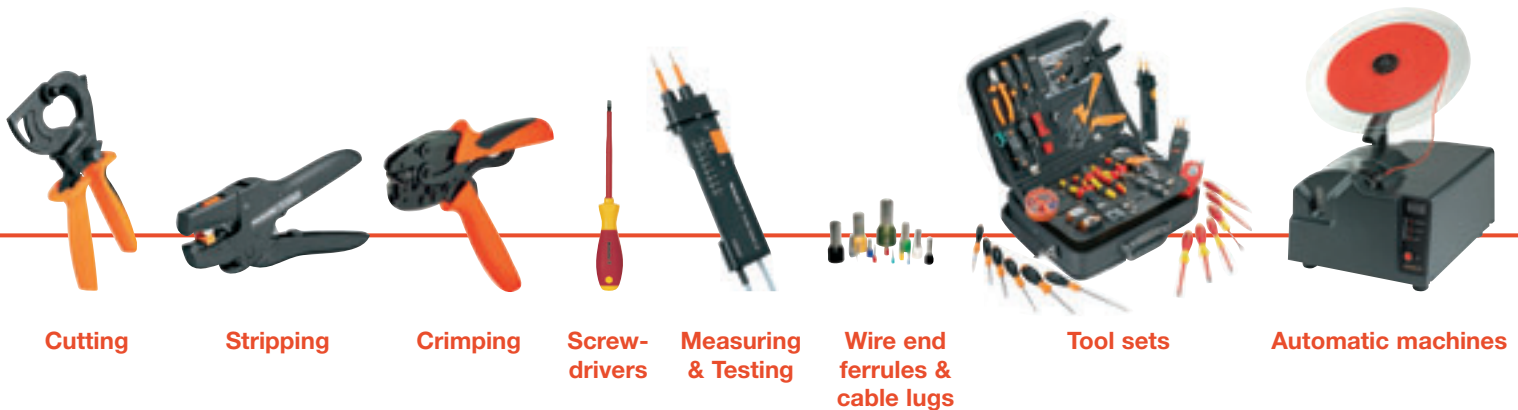

Precise tools – in use all over the world

Precision tools from Weidmüller are in use around the globe. As both a requirement and an incentive, and thus Weidmüller offers additional services above and beyond its diverse high-quality product program.

Tools should always deliver a consistent result during the daily work routine – even after much use. With the use of technical testing techniques, Weidmüller vouches for the functionality, durability and quality of its tools. Weidmüller guarantees the consistent performance of its tools, in accordance with national and international norms and standards.

The tool family includes professional high-quality **hand tools** for cutting, stripping, crimping, screwing, measuring and testing. The product spectrum is being expanded to include **tool sets** which provide an efficient and logical combination of tools and accessories. Weidmüller **automatic machines** save valuable time by automating constantly-repeated work flows.

Marking systems – everything from a single source

Weidmüller offer a comprehensive product family for the marking and labelling of devices, wires and connectors.

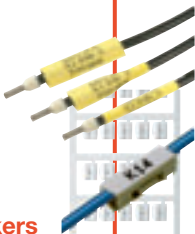

The labelling systems can use the data from your existing CAE software for quick and permanent printing. Weidmüller's **MultiCard concept** has established a global standard. We supply high-quality and trend-setting marking systems for Weidmüller products and for products from our competitors. This includes laser, thermal transfer and inkjet printing for a variety of applications, and plotters. This provides for an **unambiguous, clearly-structured and long-lasting marking**. When desired, Weidmüller also delivers pre-printed markings.

Many **installation materials** are also available to facilitate efficient wiring – such as labels, shrink sleeves, cable ties, junction box terminals with proven spring-connection technology, and lighting terminals.

Customised service for the customer – CSA

Assembled enclosures, with terminal strips and connectors

Customer-specified assembly of kits

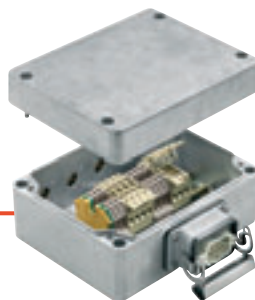

In the initial stages of cooperation, a healthy exchange of ideas over the problems and tasks at hand is critical. For our part, we focus on conducting a detailed consultation, with particular attention directed to:

- **Design and engineering**
- **The optimal selection of products**
- **Meaningful pre-assembly**
- **Integration within your system installation**
- **Consideration of sector-specific requirements such as certifications, protection classes or danger protection (such as ATEX applications in the process industry)**

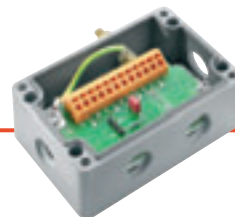

In this way, solutions can be found that are persistent throughout the entire value-creation chain - solutions leading to effective product development and to perfect results. We support your business with our experience.

Heavy-duty connectors with pre-assembled cable

Assembled enclosures

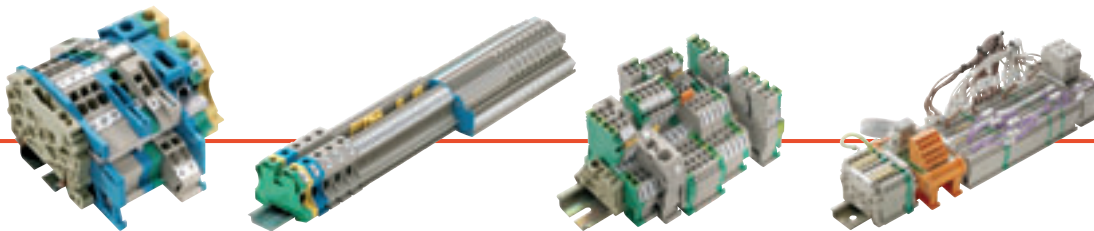

Customer-specific electronics

Service – for us that means: a wide offering of engineering and handling services; a variety of components and pre-assembled component sets; and coordination of logistics. You can rely on our comprehensive resources:

- Production of mounting rails and enclosures - assembled and fitted with our terminal blocks and components - and pre-wired
- Adding cable glands and marking terminals, wires and enclosures to your requirements
- Expertise in working with enclosure materials, such as aluminium, plastic, painted steel and stainless steel
- Flexibility when you select our product: we will integrate products from other manufactures (such as cables and switching devices) to meet your requirements
- Pre-assembled components and kits, such as heavy-duty connectors and PCB terminals with cable assembly
- Customer-specific modifications of electronic components, such as switch-mode power supplies, signal conditioners or interface units

We increase your capacity with these offerings, by serving as your external service provider. We guarantee a high-level of quality with our certified production facilities.

Our production delivering solutions for you – individually and professionally.

These are the advantages that you can count on with Weidmüller:

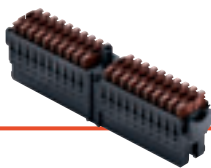

- Professional design and engineering focussed on your tasks
- Trouble-free procurement of individual components
- Trouble-free mounting of individual components
- A single order number for your module
- Consistent and high-quality manufacturing

OEM – innovation and speed in development

A cost-effective division of labor is more important now than ever in order to thrive in a global market. The market demands product innovations as well as ever-shorter development cycles. Weidmüller's OEM (original equipment manufacturer) business division offers a complete package of services including engineering, procurement, production and logistics.

Weidmüller develops innovative product solutions according to the specific requirements of our customers. Weidmüller reacts promptly to your needs and wishes. We will work together with you in an innovation workshop in order to develop a technical solution for your application. After the conclusion of this conceptual phase, you will receive a comprehensive offer, including a feasibility study, patent research and a precise timeline. The development process is conducted in a highly cooperative and interactive manner.

SIEMENS

The S7 IDC front connector

- Insulation-displacement connection technology
- Competence in metals and plastics

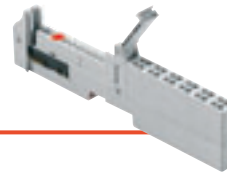

OMRON

IP54

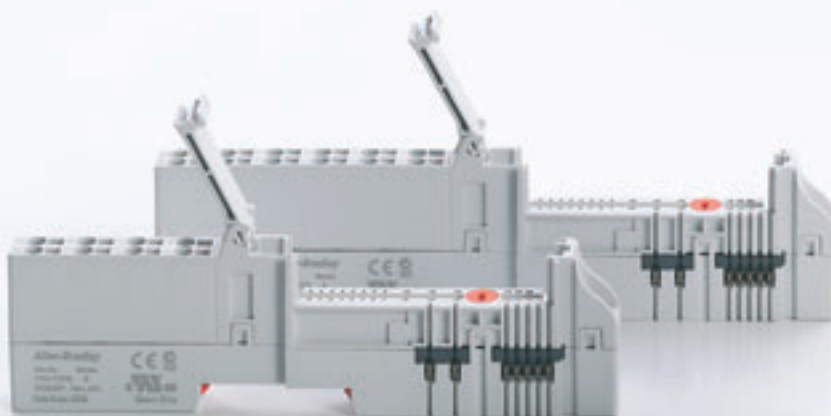

- Piercing and Push In connection technology
- Competence in seals and plastics

ROCKWELL AUTOMATION

LCT Point I/O

- Push In connection technology
- Competence in metals and plastics for terminal modules

Your advantages at a glance:

- **Everything from a single source**

Weidmüller, as a supplier of complete solutions, serves as your consultant, developer and manufacturer during the entire design and production process. Customers interact directly with a local representative, who ensures the directness and efficiency of the work. Our professional project management guarantees that your project will meet both its goals and its deadline.

- **Based on Weidmüller know-how**

Weidmüller possesses a time-tested expertise in connection technologies. We offer innovative product ideas in the field of sealing technology. We have gained a high level of experience in the fields of tool making, metal surface coatings, and the processing of plastics. You are guaranteed to receive a high-quality product that adheres to proven Weidmüller standards.

- **Convert fixed into variable costs; minimise your risks.**

The outsourcing of complex tasks gives you a business advantage and allows you more organisational freedom. Your technical, development and business risks are minimised. You do not need any extra manpower or expensive storage capacity. And your purchasing load is lightened. Fixed costs are converted to variable costs.

- **Concentrate on your own core competencies.**

Weidmüller takes care of the complete electro-mechanical connection system including the sealed housing – so that your customers can focus on the core of your business.

Thanks to Weidmüller's performance, you save time and cut costs. The "time to market" phase of your product will be shortened significantly. Your core business is, once again, the focus of attention. In addition, the innovative result gives you a head start over the competition.

Exacting demands are the top priority for Weidmüller. Our OEM references, shown to the left, document this.

These are the advantages that you can count on with Weidmüller:

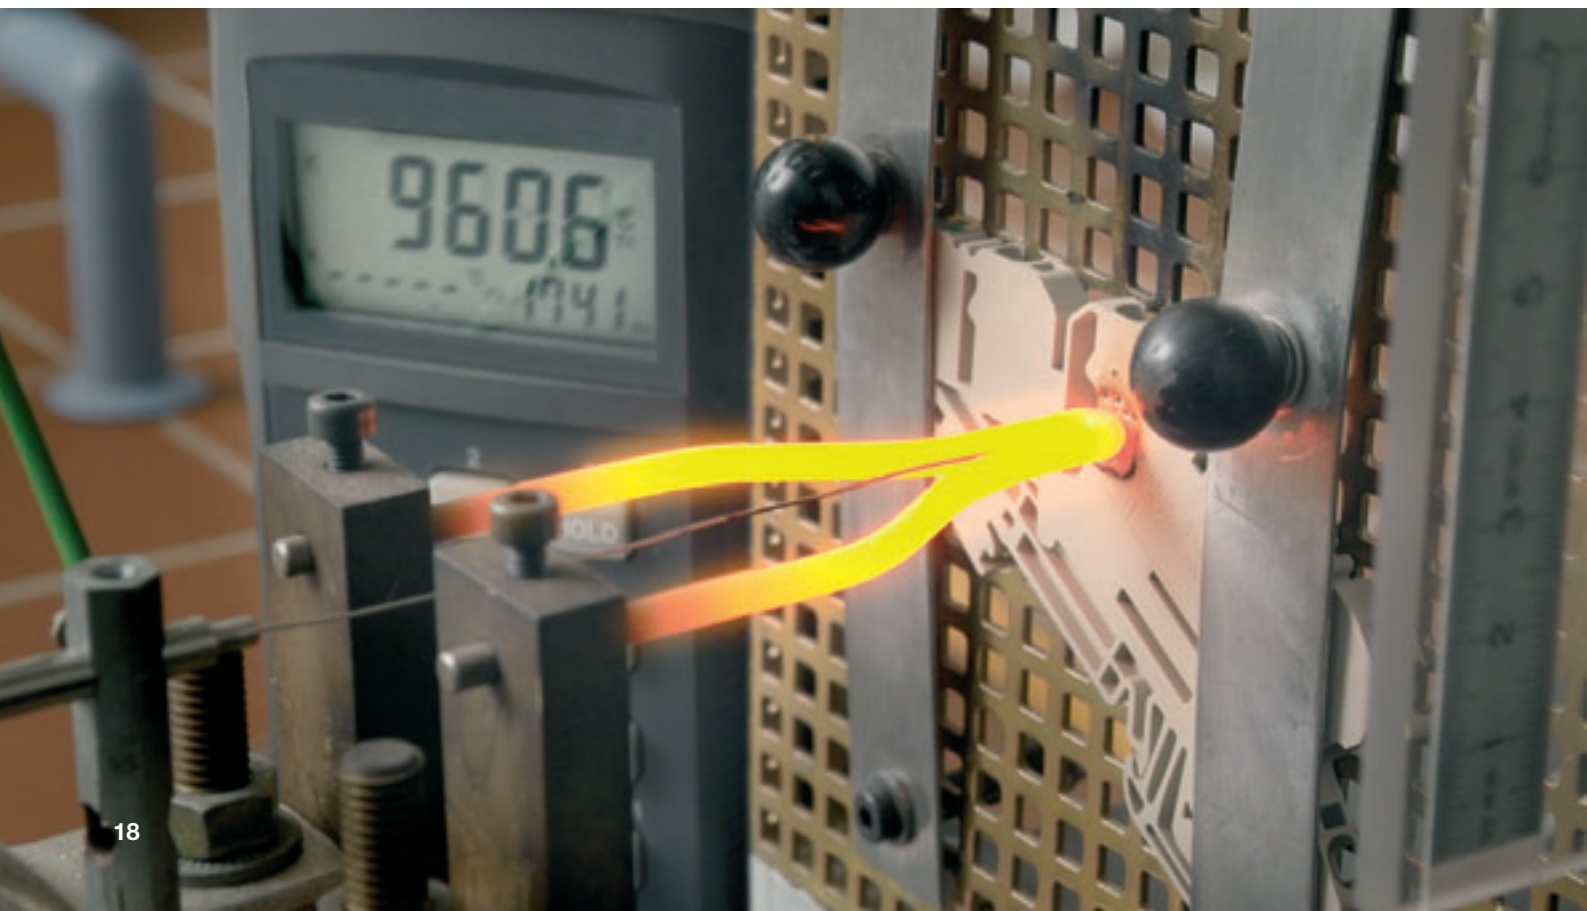

- **Everything from a single source**
- **Based on Weidmüller know-how**
- **Convert fixed into variable costs; minimise your risks.**
- **Concentrate on your own core competencies.**

Top quality and numerous approvals – for your safety

In order to always deliver to you first-class products, quality control is of the utmost importance to us. Beginning with our product quality management under ISO 9000 ff., and extending to the continuous monitoring by independent institutes. These control our production facilities, our quality management and our own laboratory. And so we benefit from total reliability and longevity!

Accredited testing laboratories

The reliability of the technical data is of the utmost importance to the user. Our lab has DIN EN ISO/IEC accreditations from an external independent institution (the German Accreditation Body for Technology GmbH). This enables our lab to carry out certified tests for terminal blocks, connectors, and electronic equipment – including EMC and environmental impact tests. And so you can be sure that our products can be used throughout the world.

Product approvals

Approvals are proof of the quality of our products. The approvals are granted following performance tests carried out by independent institutions, and are the prerequisite for product use in certain markets or fields of applications.

Certifications

Quality management in the Weidmüller group of companies is based on ISO 9000 ff. Certified verification by accredited certification bodies makes it easier for you to judge suppliers.

Weidmüller is the leading manufacturer of components for electrical connection technology to transmit energy, signals and data. The Weidmüller product portfolio ranges from terminal blocks, PCB connectors and terminals, protected components, Industrial Ethernet components, I/O components and relay sockets to power supplies and overvoltage protection modules suitable for all applications. Assemble Services, marking solutions with a variety of tools and software systems, round off the range. As an OEM supplier, the company sets global standards in the field of electrical connection technology.

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media. For this purpose we list corrections, which have been identified after publishing printed media, on our web site at www.weidmueller.com. For convenience we list these corrections against product catalogue number and/or page number. This Internet-database is part of our catalogue.

All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.

Order number:
5658440000/04/2007/DMMD
