Wind Energy Exhibition goes online

EXPO21XX has done it again! The leading specialist in the online exhibition business has opened WIND ENERGY 21XX to support the sustainable and efficient development of wind energy. This wind energy exhibition will not only contribute significantly in achieving the ambitious targets of the wind industry, but also help in bringing the vision of "100 percent electricity from renewable sources" closer to reality.

With pioneering spirit and know-how EXPO21XX brings together international equipment and [wind energy manufacturers](#) and designers on this unique platform. Currently, EXPO21XX offers thirty-one specific areas for the industry to display their products and services. What is fascinating about WIND ENERGY 21XX is the inclusion of onshore and offshore projects, services such as wires and cable protection, logistics and transport, and research and development. Among the exhibitors are Siemens, Vestas and the German safety certification giant, TÜV NORD. WIND ENERGY 21XX attracts and brings the energy industry in focus of international professionals, government and public.

Grid expansions and the switch to alternative energy sources are still in the development stages. WIND ENERGY 21XX is the first step in building a network of strong partners that would allow the industry to announce their products, innovations and services internationally.

After a successful entry into the field of renewable energy, we are now on our way to specialized markets. With WIND ENERGY 21XX we try to bring together all wind energy manufacturers on our platform. The equipment presented on this online trade show includes [wind turbines](#) and drive technology but also components like rotor blades or Monitoring Systems" as EXPO21XX's CEO Markus Baumgartner illustrates.

In addition to the online exhibition, EXPO21XX is publishing latest company and product information of the wind power industry on EXPO21XX NEWS.

About EXPO21XX

EXPO21XX is an online exhibition platform was founded in 2000 to bring the conventional trade fairs to the internet. Conventional trade fairs demand that you display your brands or products short-term at one location, mostly for a few days or a week. **EXPO21XX.com** serves as a better alternative by bringing the products online to help manufacturers virtually and yet profitably launch their products. The essences of the products are presented through quality videos, images and descriptions.

More than 3500 exhibitors from America, China, Russia, and South Africa to Europe present their products and solutions in over 360 exhibition halls. The products include but not limited to electric motors, sailing yachts, agricultural machinery and industrial robots. **EXPO21XX.com** is continuously working to open other areas of research to enable and promote innovative ideas as well as interdisciplinary and developmental projects. Further, it plans to develop other new business areas and exhibition tools to expand and improve the presence of participating companies and institutes to the global market.
