ENJOY SEATING PERFORMANCE.

17C2

/ CAMPOS

Clear design and the sum of everything that makes a good office swivel chair: precision work using quality materials, understated integrated details which invite to look and touch. Best performance in design, ergonomics, quality and price.

Choose from numerous materials and colours. An individual design for every office area.

FRESH COLOURS
EMPHASIS DESIGN

The backrest height adjustment wheel: Precisely finished, highlighted as an attractive detail.

Large lever for weight regulation and seat height adjustment which is intuitive to use.

Seat depth and inclination can be individually adjusted in one single operation.

4D T-armrests, adjustable in four directions or 2D T-armrests, height and width adjustable with soft armpads.

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preventive medicine and eases the pain for those who already suffer. What does

an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes confirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

1 Synchronous mechanism

The synchronous movement of the seat and backrest provides optimum support for the back in every position; the push effect is eliminated.

2 Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.

3 Back height adjustment

The support range for the lumbar spine can be ideally adjusted to the height of the user.

4 Seat depth adjustment

Regulates the distance between the backrest and front edge of the seat, thus providing optimum support for the upper thighs; even for taller users.

5 Adjustable seat inclination

Multiple adjustment of the seat in a forwards direction stops the pelvis from tilting back. This relieves the spine and avoids a poor posture.

6 Adjustable lumbar support

The horizontally adjustable lumbar support adapts to the individual curve of the lumbar spine; this reduces muscle strain.

7 Adjustable armrests

Height adjustment to take the strain off the neck muscles. Width adjustment and pivoting for optimum support angle, depth adjustment for optimum distance to the desk.

Angel

Campos comes from the design office .mollDesign. Apart from the job of giving every new product its own identity and a touch of invulnerability, .mollDesign concentrates on the practical value as well as ergonomic and energy technology for every new design. This ensures its existence and *raison d'être* in the long term. High quality and efficiency were the driving forces behind the development of Campos.
