

mauser

intelligent furniture – since 1896

Workstation system

arcos

Attractive office interior solutions.

Workstations that motivate people in all office environments – from mauser of course.

Aesthetic

arcos
Workstations for free spirits.

Linear elegance.

The frame of the desk has been reduced to the essentials and follows the form of a bridge arch that lets the top float above it. Appealing aesthetic, clarity and transparency give a feeling of openness and freedom.

Fundamental interplay.

An important feature is the combination of rectangular and square tubes. The stronger, square-shaped table leg conveys stability, while the slim, rectangular crossbar radiates particular lightness.

Personal

arcos

Workstations for individualists.

Welcome individuality.

arcos can be adapted to individual taste, workflow or corporate design. Up to 1,400 different workplace variants can be created by forming individual combinations out of 4 desk depths, 9 desk widths and more than 200 desk shapes.

Intelligent space management.

Practical functions promote privacy and increase space efficiency. The 'third level' of arcos ensures a more efficient use of expensive space and can transform the workplace into an elegant reception or information desk.

Structured

arcos
Workstations for everyone.

Employee-friendly open plan solution.

The transparent and modular construction creates an employee-friendly, open atmosphere, even if many workplaces are arranged in a compact way. Especially pleasant are the many options regarding the acoustic and territorial separation.

Useful storage space connection.

arcos can easily be combined with extremely space-saving storage systems. For example with the matching extendable and acoustically effective mauser pull-out workstation side filer.

Harmonic

arcos
Workstations for design enthusiasts.

Harmony of design.

With its continuous and versatile form, timeless design and subtle colours, arcos easily follows the architecture. Workplace and environment form a harmonious whole.

Motivating atmosphere.

arcos makes interior design easy. New office layouts, which combine functionality and aesthetic, can be created over and over again, thanks to its modular construction. In addition, subtle screens as well as acoustically effective sideboards promote concentration and productivity.

Helpful

arcos
Workstations for listeners.

Open doors.

If the workplace also serves as a consulting area for colleagues and clients, arcos offers many possibilities. The consultant extension desk makes it possible to communicate at eye level.

Consistent look.

The colours and materials of the desks are harmonised by the cabinet elements and containers. Apart from storage, work and consulting space, they complete the overall picture of integrated system solutions.

Neat

arcos

Workstations for movers and shakers.

Elegant management style.

A generously dimensioned workplace with an angle extension desk helps managers be in control of any situation – no annoying table legs in the seat region, but a lot of space for documents on the desktop, which makes it easy to stay on top of things.

High efficiency.

Apart from a wide variety of desk shapes, arcos offers many additional efficiency solutions. The monitor swivel arm contributes to an ergonomic working environment and saves table space, with the third level providing additional storage space.

Organised

arcos
Workstations for organisers.

Clean workplace.

A work desk is there to be used and worked on, not to be covered in documents. Therefore, it is best to store those documents in cabinets or, for example, in an individually equipped pull-out workstation side filer for storage space directly at the workplace. This saves time, avoids disturbance and helps keep the workplace organised.

Personal touch.

Not only arcos offers extensive options: the pull-out workstation side filer can be equipped with dividers, filing drawers or shelves to meet the customer's requirement. Personal objects can be stored securely in the lockable private compartment.

Appealing

arcos

Workstations for contact persons.

Versatile meeting point.

Team leaders, doctors and lawyers are always there to listen to people. It is at their workplace where conversations are held, documents are examined and advice is given, either in a standing or sitting position. Therefore, arcos offers all the relevant extensions and screens to fit any situation.

Puristic design.

The restrained, harmonic colour concept of the furniture creates a neutral and comfortable conversation atmosphere, which forms an excellent basis for open communication.

Communicative

arcos

Workstations for project teams.

Related environments.

arcos can be used for any purpose, ranging from serving as an individual workstation or meeting table to being part of a comprehensive conference system. It is ideal for project managers and project teams as well as all kinds of meetings in any department.

Worldwide network connection.

arcos offers great possibilities regarding IT and telecommunication systems to support the personal and creative exchange of ideas. For example with the integrated media box.

Educational

arcos
Workstations for learners.

Essential work equipment.

Learners do not only need a good lecturer, but also a positive learning atmosphere. With its generous legroom, arcos guarantees a comfortable learning position and a lot of space for documents.

Stable connection.

arcos can easily be connected and disconnected with bigger systems. It is perfect for all seminar rooms where desk configurations change a lot and flexible desks are a crucial factor.

Versatile

arcos
Workstations for economists.

Pioneering equipment.

The arcos system offers pioneering accessories which help retrofit or modify work-places even after many years in service. For example separate, easily retrofitted and infinitely adjustable stand/sit modules.

Square tube frame.
Telescopic height adjustment.

Round tube frame.
Telescopic height adjustment.

Telescopic height adjustment.

CPU bracket mounted inside.

CPU bracket mounted outside.

CPU bracket/printer shelf combination.

Drop-down cable duct (front).

Drop-down cable duct (rear).

Sliding top.

Cable grommet.

Functional cable grommet.

Modern netbox.

3. level.

Back panel.

Charging station for mobile phones.

- Square tube
- Round tube

Frame colours:

- White aluminium RAL 9006
- Anthracite grey RAL 7016
- Graphite black RAL 9011
- Pure white 9010

Sustainable

arcos

Workstations for those who care about the environment.

Ecology and economy.

From the start, the design and engineering of arcos has included the exclusive use of premium quality materials with long life cycles. arcos is being manufactured under consideration of ecologic and economic aspects. And when we deliver, we abstain from almost all packaging by using competent furniture shipping companies.

Steel table bases are up to 100 % recyclable. If an arcos desk is returned to mauser after many years in service, the materials used will initially be separated and sorted by material type. The steel will be supplied to certified recycling service providers whilst the tops are disposed of in an environmentally compatible manner to recover their energy content. We are happy to assist in the return of used products.

Guaranteed quality standards.

Our company is DIN EN ISO 9001, DIN EN ISO 5001, as well as DIN EN ISO 14001-certified. The series 'arcos' complies with all current office standards and requirements.

Adaptable

Desks for technical equipment and filing

Extension boards option of rear side installation

Desks (meeting tables starting from a width of 1200 mm)

Angle extension desks optional link either on the right or left

Conference elements

Linking panels 90° (linking sides 800 mm)

Balloon-shaped linking panels 90°

Extension boards optional installation at the side

Height-adjustable add-on standing desk

Meeting tables

arcos

Workstations for designers.

Wide choice of top shapes and sizes.

The arcos workstation system offers a supremely wide choice of standardised top shapes and sizes, not only for desks but also for meeting tables.

Premium materials.

Regarding the table tops, one can choose between a sturdy 25mm E1 fine chipboard top in a melamine or veneer finish and a slim looking 13mm solid core or MDF top. Impact-resistant lipping with rounded edges protects table top rims.

Individually-shaped desks

Add-on desks 45° (linking sides 800 mm, linked on right/left)

Linking sides 45° (linking sides 900 mm, linked on right/left)

Add-on desks 45° (linking sides 1000 mm, linked on right/left)
