elegant move Mobile Shelving System

100% more space on the same footprint.

Space-saving mobile shelving makes efficient use of storage space in stockrooms and warehouses.

Compared to static shelving, the elegant move mobile shelving system enables twice the number of shelving units to be installed on the same footprint. Storage capacity is therefore increased by nearly 100%. This often enables you to avoid renting additional storage space.

Details

- Space-saving mobile shelving system to store cartons and tools as well as small items in semi-open storage boxes or transport bins on galvanised shelves (25 mm canted edges), height-adjustable in increments of 25 mm.
- 3 heights: 1715 mm, 2040 mm, 2340 mm. Variable overall length (see table for ready-configured models), incl. service aisle with minimum width of 750 mm.
- bay width 1000 mm, overall width: 1200 mm.

- Rigidity provided by in-bay diagonal bracing.
- Shelving units operated using standard hand-wheels. Hand-rail or electric-powered operation options on request.
- Units travel smoothly on integrated platform, optional: can be locked as a closed-off block.
- Fronts available in a range of options. Standard: sheet steel panels in RAL 7035 light-grey finish (other colours available as optional extras, see page 202), optionally in perforated metal or sound-proofed finishes.

The shelving platform rests solidly on the flooring without additional bracing. Here the straight-edged version.

Alternative: shelving platform with chamfered edging (on request).

Galvanised shelves.

10 year juarante
