

**mauser**

intelligent furniture – since 1896

Storage System

# kontoro

Shapely variety of high-quality steel.

Cabinets for the office – from mauser of course.

Product engineering team at mauser

# Concept

The diverse work processes in a modern office pose most different challenges to a storage system: high flexibility, user-friendly combinations, unlimited variety of different arrangements and designs, and an attractive, contemporary design. Thanks to its modular construction that enables e. g. easy assembly of height extensions, diametrical arrangement on demand, and customer specified cabinet fronts, our new cabinet system **kontoro** is easily compatible to any office landscape.

**Isn't that clever?**

Design | Jens Korte

„Like all mauser furniture systems the steel cabinet system kontoro convinces by high-quality workmanship and is extremely robust and highly stable. Nevertheless it appeals by lightness and elegant purism due to a straight and clear cut shape.“

kontoro –  
the new symbiosis  
of classical  
and transparent design.

Steel office furniture can be combined with any other material according to your choice; the combination of stone and glass also creates a harmonious atmosphere.

kontoro –  
a successful integration  
of steel into the  
modern office.

Steel, glass and stone in harmonious combination.

Because of seven different cabinet widths kontoro is adaptable to any office setting.

# Variants of furniture fittings

## Forms and materials of pure elegance

The options for possible designs are manifold, yet they all follow the basic principle of elegant purism.

### Cover variants

- 1. fine flake board  
real wood veneer 25 mm
- 2. fine flake board melamine  
resin-coated 25 mm
- 3. MDF-board  
melamine resin-coated 13 mm
- 4. steel cover 11 mm
- 5. high pressure laminate-board  
melamine resin-coated 13 mm

### Handle variants

- slender metal handle in a  
simple and elegant appearance
- handle bar for convenient  
ease-of-use
- lockable front with full height  
recessed handle

## Design diversity deluxe

The wide selection of fronts provides various user-friendly opportunities.

### Fronts

• open

• glass door

• folding door

• drawer with self-closing device

• sliding door

• horizontal roller shutter

kontoro creates versatile office settings by highly flexible cabinet modules.

kontoro –  
a stylish contrast  
in urban offices

If in an architecture firm, in a design studio or in an IT company, kontoro subtly attracts attention without dominating the architecture of the office.

The clear-cut contours of the kontoro elements create a stylish contrast to the atmosphere of urban workplaces.

## Details

**Quality workmanship, visual appearance, and smooth haptics – nothing was left to chance.**

Because of the amount of elaborate details a high-quality cabinet system like **kontoro** contrasts sharply with the conventional norm.

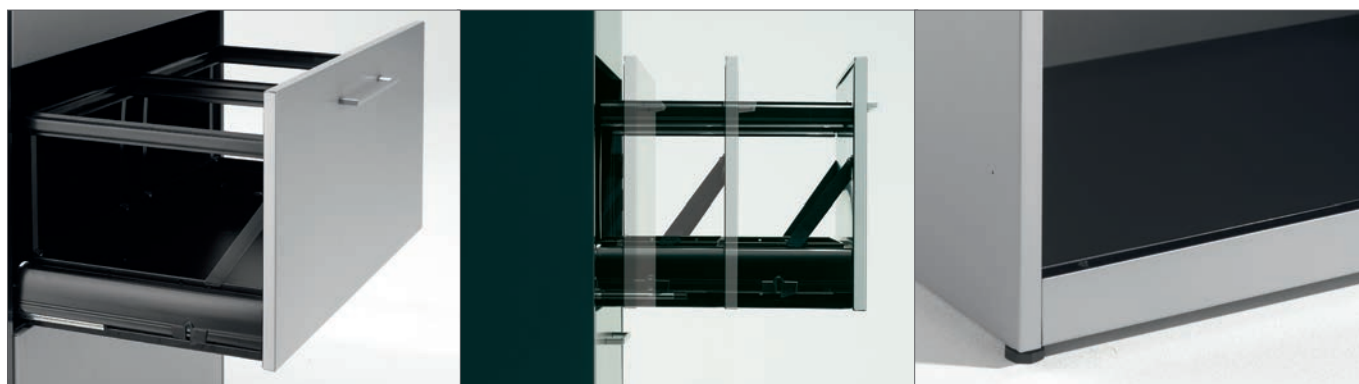

### Perfection down to the last detail

- Great attention to detail: the line of drill holes for the shelves is covered in the visible front part.

- The possibility of putting different cabinet elements on top of each other allows many combinations with identical covers.

- Same plinth height for all basic elements.

- Drawer on concealed telescopic guides (steel covers).

- Integrated self-closing device

- Accurate workmanship (2 mm joint width) and easily adjustable height compensation bolt at each base element.

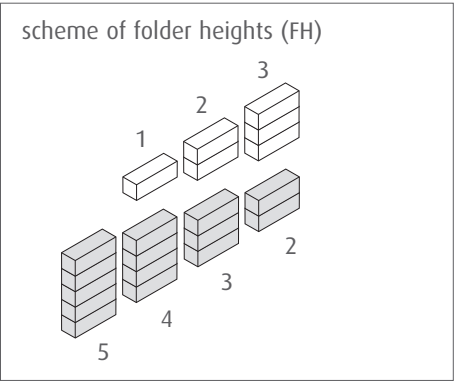

# Height Options

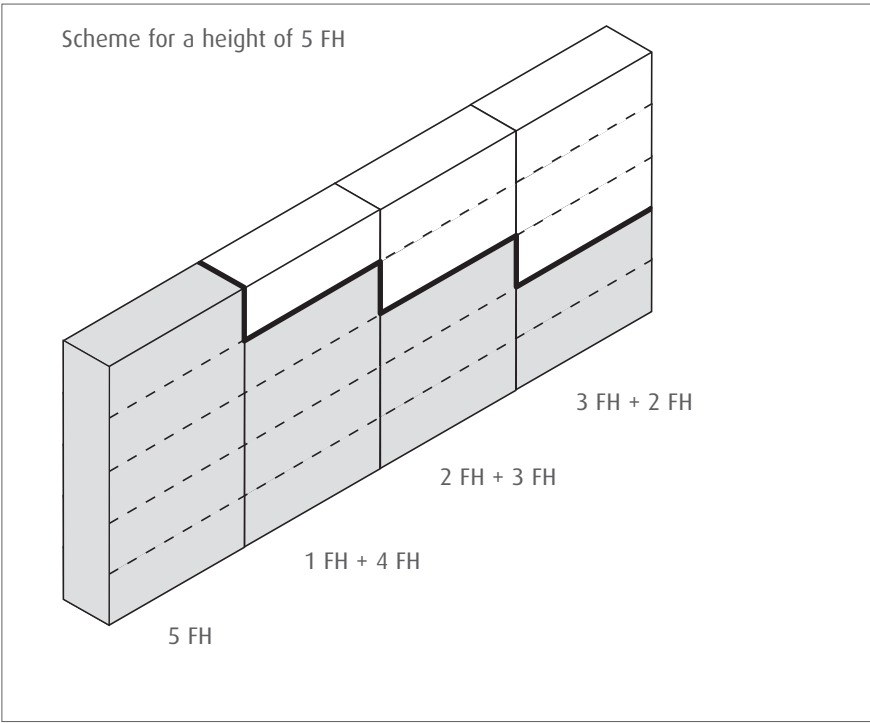

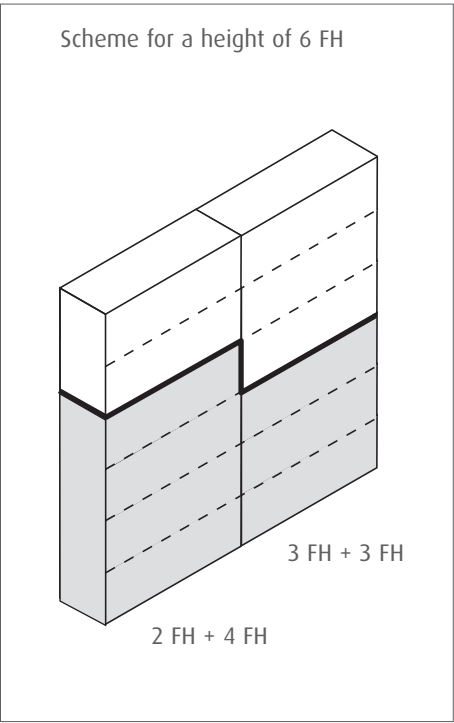

## Flexibility as the measure of all things

The sky is the limit is no exaggeration since kontoro is a demonstration for an unlimited variety of different arrangements and designs as well as for all possible filing and storage systems.

### Efficient use of space by different height options

Because of its modular construction **kontoro** offers solutions for any occupational environment. Assembling is as easy as child’s play: additionally, linking elements for side extensions guarantee a robust and visually uniform cabinet front. Fronts and back sides of the cabinets can be placed at an angle of 180° to each other. It is possible to integrate textile back covers. Both options allow even more individuality.

kontoro emphasizes a splendid office atmosphere, e. g. in old and classical mansions.

kontoro - pure design  
for the classical office

Any envisioned storage solution is feasible on an individual and flexible basis.

# Acoustics

## Hearing less, yet understanding more.

Especially at workplaces, acoustic convenience is the basis for human motivation and efficiency.

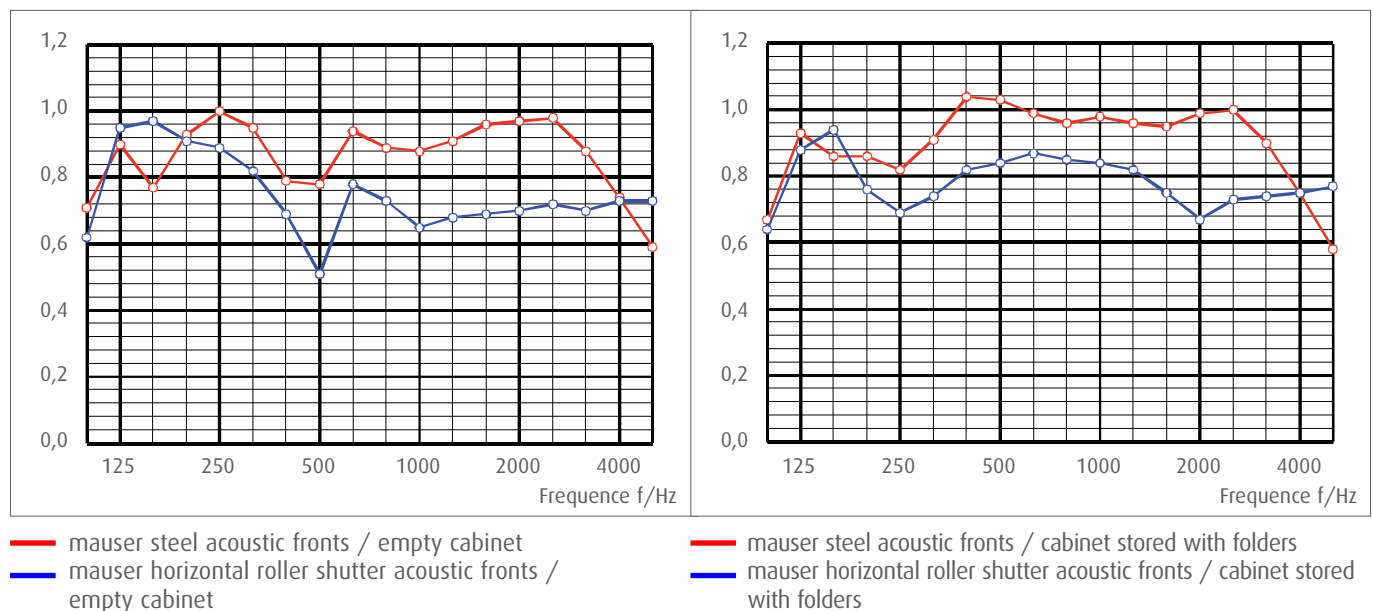

In trying to create open and transparent work environments that allow direct communication the design of room acoustics is of increasing importance. Since there is also a trend toward hard and sound-reflecting construction materials, furnishings are more and more brought to the focus of attention.

Storage systems with acoustically absorptive surfaces reduce sound propagation and protect employees from tedious noise (noise level).

mauser einrichtungssysteme has developed acoustically absorptive fronts for the steel cabinet program **kontoro** in different versions for sliding door, drawer, and horizontal roller shutter cabinets. The results speak for themselves: working in an acoustically convenient environment is more concentrated and thus more effective. Communication is significantly improved; the overall climate in the office is more comfortable and stress-triggering factors are minimized.

### Sound absorption coefficients of mauser's steel and synthetic acoustic fronts

mauser Stahl-Akustik-Fronten: Absorptionsgrad  
mauser Querrollladen-Akustik-Fronten: Absorptionsgrad

$\alpha_w^* = 0,95$  (Schallabsorberklasse A)  
 $\alpha_w^* = 0,80$  (Schallabsorberklasse B)

\* Values for cabinets filed with folders according to ISO 11654, Institute for noise testing: Müller BBM GmbH (Munich)

## Listen to your office.

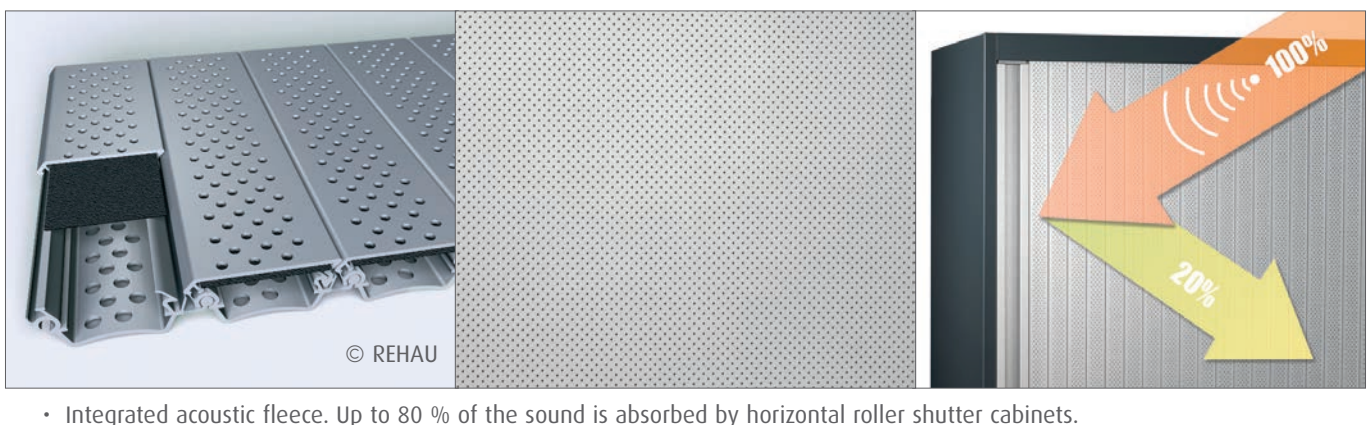

### Steel fronts with acoustically absorptive characteristics

The sound absorption coefficient ( $\alpha_w$ ) of our acoustically absorptive cabinets with steel fronts (and stored with folders) has its maximum at  $\alpha_w = 0.95$ . This implies that sound waves hitting the cabinet fronts are absorbed to a degree of 95 % and just 5 % are reflected into the room.

### Synthetic fronts with acoustically absorptive characteristics

The sound absorption coefficient ( $\alpha_w$ ) of our acoustically absorptive horizontal roller shutter cabinets (stored with folders) equals 0.8. Only 20 % of all incoming sound waves are reflected, i.e. 80 % of the sound waves are absorbed.

Wardrobe, 600 mm deep

## Details

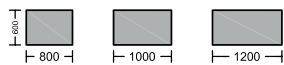

- four lockers for personal valuables (optional)

- wardrobe clothes rail

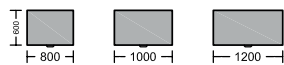

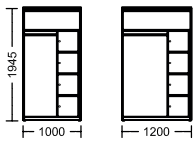

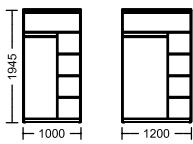

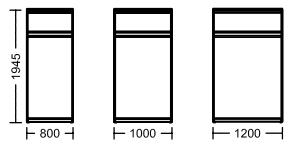

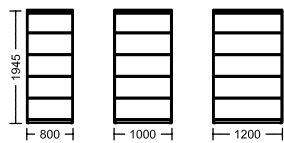

- Ventilation slots in the lower and upper part of the back cover guarantee a constant provision of fresh air.

## Concept development, project management and -coordination

### Konzeptentwicklung, Projektunterstützung und -koordination

We, mauser or our approved partners, support you in all phases of your concept development and planning process. Our well proven 10-step program guarantees you highly efficient proces-

ses of planning and realization as well as optimal long-term profitability of your property after completion.

1. Individual customer service for finding a concerted concept
2. Careful analysis of all relevant preconditions for a sustained equipment solution
3. Display of functional processes
4. Development of room and office concepts
5. Furnishing concept according to floor plans
6. Co-ordination according to surface and color samples.
7. Compiling a catalogue with individual product samples
8. Surface design according to prior agreement
9. Time scheduling for shipping
10. Delivery, mounting, customer service

**Our company is certified according to ISO 9001 and ISO 14001.**
