intelligent furniture – since 1896

Desking System

varitos.c

Versatile office interior solutions.

Workstations that motivate people in all office environments – from mauser of course.

Outstanding

varitos.c

Workstations for those at the cutting edge.

More opportunities for new ideas.

varitos.c has an extensive range of applications and is therefore compatible with a whole host of different office interior concepts. Ranging from single-occupant offices to open-space solutions, from project workshops to executive offices. Ideal for those at the cutting edge, who wish to implement new ideas in the "modern office" quickly and cost-effectively.

More ergonomic benefits.

varitos.c helps your staff to stay healthy. A range of height adjustment options enables users to customize the ergonomics of their workstations to an even greater degree. Furthermore the stand/sit version encourages people to change working positions and provides a "healthy" dose of exercise in the office. This Jens Korte design picks up on the traditional design vocabulary of classic steel tube furniture and projects it into the 21st century.

Designer Jens Korte

Dynamic

varitos.c

Workstations for creative professionals.

varitos.c in stand/sit workstation format.

Thinking creatively, viewing things from various perspectives. The stand/sit workstation version of varitos.c enables this to happen. Standing up, breathing deeply and moving your desk top up a level or two makes generating and developing ideas fun.

Flexible height adjustability in standard desk format too.

The standard height adjustment feature already caters for short and tall people.

Inviting

varitos.c

Workstations for role models.

Reception in keeping with corporate style.

varitos.c conveys that "first impression" in exactly the style that matches your company. For example as an elegant counter, where people's personal space is respected. Or much more face-to-face, in the form of a same-level reception and information desk.

Welcome to the lobby, lounge and reception!

varitos.c features a wide range of finishes that enable it to dovetail easily with its surroundings and with your corporate image.

Growth-enhancing

varitos.c

Workstations for movers and shakers.

The interior that grows as you grow.

varitos.c accompanies businesses through all phases of growth. All workstations can be modularly upgraded. Extensions and additions can be actioned quickly, easily and cost-effectively. Even as far as same system meeting room solutions.

varitos.c can be reconfigured at any time.

New tasks, new projects and relocations often require spontaneous adjustments of office work processes. varitos.c's modular design means it can cope with any eventuality.

Team-focused

varitos.c

Workstations for open-plan team players.

Working undisturbed in open-plan offices.

Efficiency combined with a feel-good atmosphere. varitos.c's open-ended design allows for a wide range of combinations with mauser's sound-absorbing partition and storage systems.

Functioning structures with privacy.

Light and transparency instead of dark boxes. varitos.c creates workstations that facilitate communication, yet at the same time provide enough privacy to let you think. The result is greater satisfaction and increased efficiency.

Inspirational

varitos.c

Workstations for innovators.

Wider perspective.

Innovators require open spaces that inspire them. varitos.c allows for superior configurations that flexibly back up spacious room concepts.

Contented staff.

Companies that wish to retain their staff long-term can use varitos.c as a motivator. For this system is capable of catering very specifically for a wide range of design and functional requirements.

Intelligent

varitos.c

Workstations for lateral thinkers.

Effective use of space.

Space-saving as well as user benefits. A smart combination of workstation and storage system facilitates direct access to documents and conceals cables. Integrated coat hooks dispense with the need for coat racks.

Motivational accentuation.

The wide choice of colour finishes for decorative beam panels and cantilevers coupled with the broad range of attractive laminates and veneers for desk tops provides extra motivation.

Ergonomic

varitos.c

Workstations for the health-conscious.

Raise your desks and lower the rate of absenteeism due to sickness.

Continuous, fast and quiet. That is how electromotive height adjustment functions on the stand/sit workstation. Ideal for office teams that want to keep both mentally and physically fit.

Greater concentration. Better communication.

Being able to think things through undisturbed and yet if necessary being able to communicate with one another. Whilst screens afford some privacy, the open design of the C-leg frame encourages team mobility.

Communicative

varitos.c
Workstations for two.

Successful duo.

varitos.c in a face-to-face configuration once again demonstrates the benefits of its modular design. This desk combination conveys a welcome impression of transparency, no matter how confined the interior. Elements of corporate design can feature in the colour finishes of the decorative panels.

Enhancing teamwork.

Short distances, actively sharing information and ideas. People can agree on issues straightaway in person, there's no wastage. The double workstation can help teams to bond and to accelerate work processes.

Distinguished

varitos.c
Workstations for executives.

No-frills elegance.

Sometimes a no-frills look is even more elegant than any amount of finery and glamour. varitos.c features frames and cantilevers in an attractive combination of curves and straight lines, finished off by premium tops. That appeals.

Singular aura.

No varitos.c desk is "off the peg". There are dozens of options available to let you upgrade the system to an executive workstation. Ranging from bright-chromed details to freestyle-design desk tops in wood veneer finishes. Individuality is king.

Versatile

Optional collision guard sensor

(applies to electromotive height adjustment)

Operating unit:

- Up/Down (standard)
- Optional Up/Down with display
- Optional Up/Down memory with display

Design panels:

all RAL colours
high gloss chromed

Caps:

all RAL colours
high gloss chromed

Column specification:

- Adjustable (650 – 850 mm)
- Catch mechanism (650 – 850 mm)
- Power-operated (650 – 1250 mm)

Tops:

- 25 mm chipboard in laminate or veneer
- 13 mm solid core

- White aluminium RAL 9006
- Anthracite grey RAL 7016
- Graphite black RAL 9011
- Pure white RAL 9010

Optional decorative cantilever panels:

all RAL colours
high gloss chromed

varitos.c

Workstations for interior professionals.

Design consistency.

What distinguishes the three different height-adjustable versions is the adjustment mechanism and not the design. The distinctive telescope design remains the same throughout. The benefit is that your interior retains a consistent look, no matter what height adjustment mechanism you choose.

Manual telescopic height adjustment. The simple clamping mechanism allows for heights ranging from 650 to 850 mm.

Non-tool telescopic height adjustment. The catch mechanism enables you to height-adjust from 650 to 850 mm in seconds.

Electromotive telescopic height adjustment. Continuous, for stand/sit workstations. For working heights ranging from 650 to 1250 mm.

Practical accessories.

The same principle applies here too – achieve more using fewer components. In effect all accessories can be replaced quickly and easily. That ensures greater flexibility when reconfiguring workstations.

Space-saving CPU bracket. Holds the hard-disk unit securely in place.

Lateral CPU bracket. Creates space beneath the desk and makes cleaning the floor easier.

CPU bracket/printer shelf combination. Extremely space-efficient!

Convenient cable management.

varitos.c's cable management modules have been designed to enable staff to configure and if necessary modify their own cable management at their desks with little effort. For example to accommodate new IT components.

Double-sided drop-down cable duct. Conceals bundles of cables.

Practical sliding top. For fast, direct access to all cables.

Practical media flap. For instant access to the socket bar in the cable duct.

Attractive cable grommet. Keeps things tidy!

Functional cable grommet.

Modern netbox. Fast plug-in connections for "nomads".

Pencil tray.

Charging station for mobile phones.

Sustainable

varitos.c

Workstations for those who care about the environment.

Quality, longevity and sustainability.

From the start varitos.c's design and engineering has included the exclusive use of premium quality materials with long lifecycles. Our manufacturing complies with strict German environmental standards. And when we deliver we reduce the amount of packaging involved by using reusable furniture covers where appropriate.

Our Company is DIN EN ISO 9001, EN ISO 14001 as well as DIN EN ISO 50001-certified. The series varitos.c complies with all current office standards and requirements.

Recycling and disposal.

Steel table bases are up to 100 % recyclable. If a varitos.c desk is returned to mauser after many years in service, the materials used will initially be separated and sorted by material type. The steel will be supplied to certified recycling service providers whilst the tops are disposed of in an environmentally compatible manner to recover their energy content.

Adaptable

varitos.c

Workstations for the discerning.

Storage and equipment tables

Desk add-ons optional, can be attached to the rear of the desk

Desks (meeting tables start at a width of 1200 mm)

Desk returns optional, linked on right/left

Meeting table extensions

90° linking tops

Desk extensions, optional, attached to side of desk

Meeting tables

- Manual height adjustment using clamp mechanism

- Non-tool height adjustment using catch mechanism

Electromotive pushbutton-operated height adjustment

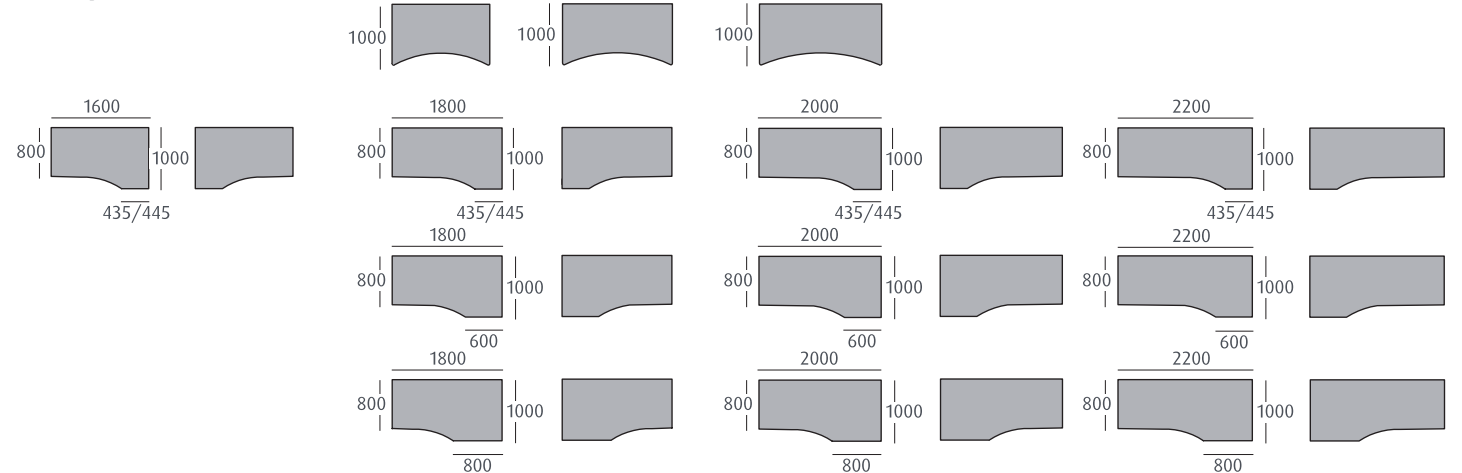

Wide choice of top shapes and sizes.

The varitos.c system offers a supremely wide choice of standardized top shapes and sizes, not only for desks but also for meeting tables to provide a perfect design match.

Premium materials.

As far as table tops are concerned, you can choose between a sturdy 25 mm E1 fine chipboard top in a laminate or veneer finish and a classic 13 mm solid core top. Impact-resistant lipping with rounded edges protects table top rims.

Freestyle tables

Angular desks/tables

Balloon-shaped executive desk extensions

Balloon-shaped mirror-image desk extensions
