

iPOS3602 INTELLIGENT SERVO DRIVES

75W

COMPACT DRIVE SOLUTION FOR ROTARY OR LINEAR BRUSHLESS, DC BRUSH AND STEP MOTORS

The iPOS3602 is based on a new design concept offering a cost effective, compact and modular solution for the control of rotary or linear brushless, DC brush, and step motors of powers up to 75W, with 36V nominal voltage.

Designed to cover from low- to high-volume applications, the iPOS drive integrates all the basic motor control functions and the motion control functionality on a single plug-in module. A series of I/O signals, both digital and analogue, are available for easy interfacing with the application.

iPOS3602 offers a flexible and modular solution at various levels: plug-in vertical (VX models) or horizontal (MX models) open PCB that can be integrated on the user's motherboard, or protected by a metal cover and provided with retractable connectors (BX models).

Thanks to the TML (Technosoft Motion Language) instruction set, the iPOS3602 is an intelligent drive programmable at user's level. In simple applications the unit can operate as a single-axis motion controller and drive, in stand-alone mode, autonomously running the program residing in its non-volatile memory. In systems that request a host, the iPOS drive operates as an intelligent slave executing motion sequences triggered by input lines or commands received via RS-232 or CAN bus communication.

The configuration, tuning and programming of the iPOS3602 drive is easy with Technosoft's powerful graphical platform, EasyMotion Studio. System configuration and parameterization are performed by selecting and testing the system structure, motor and sensor types and control mode.

Application notes with TML program examples available at www.technosoftmotion.com.

P091.028.iPOS3602.LFT.0313

iPOS3602 FEATURES

- Fully digital servo drive suitable for the control of rotary or linear brushless, DC brush, and step motors
- Very compact design
- Standard PCIe 4x mating connectors (VX models)
- Standard header 2.54 mm pitch connectors (MX models)
- Sinusoidal (FOC) or trapezoidal (Hall-based) control of brushless motors
- Open or closed-loop control of 2 and 3-phase steppers
- Various modes of operation, including: torque, speed or position control; position or speed profiles, external analogue reference or sent via communication bus
- Technosoft Motion Language (TML) instruction set for the definition and execution of motion sequences
- Standalone operation with stored motion sequences
- 1K x 16 SRAM for data acquisition
- 4K x 16 E²ROM to store TML motion programs and data
- RS-232 serial communication
- CAN-Bus 2.0B up to 1 Mbit/s
- TMLCAN and CANopen (CiA 301v4.2 and 402v3.0) protocols
- EtherCAT communication via additional extension module (optional)
- Digital and analogue I/Os:
 - Digital inputs: 5-36V, NPN [Enable, 2 Limits switches, plus general-purpose: 2 (VX model), 1 (MX model)]
 - Digital outputs: 5-36V, 0.5A, NPN open-collector [Ready, Error, plus general-purpose: 2 (VX model), 1 (MX model)]
 - Analogue inputs: 12-bit, 0-5V: Reference, Feedback (VX model) or general-purpose
- Feedback devices supported:
 - Incremental quad encoder (single-ended, open collector and differential)
 - Analogue sine/cosine incremental encoder (differential 1Vpp)
 - Digital and linear Hall sensors
- Single power supply: 9-36V; optional logic supply: 7-36V
- Output current: 2A cont. (BLDC mode); 3.2A_{PEAK} up to 100KHz PWM
- Operating ambient temperature: 0-40°C (over 40°C with derating)
- Hardware protections: short-circuit between motor phases and from motor phases to GND, over-voltage, under-voltage and I²t

DIMENSIONS, SPECIFICATION, ORDERING INFORMATION

iPOS3602 VX

iPOS3602 MX

Dimensions in mm. Drawings not to scale.

EASYMOTION STUDIO

The high level graphical development environment EasyMotion Studio, supports the configuration, parameterization and programming of the drive, through

- Motion system set-up wizard
- Tuning assistance with capture functions
- Definition, programming and testing of motion sequences

MOTION CONTROL LIBRARIES

The TML_LIB Motion Control Libraries can be used to implement a motion control application on a PC from Visual C / C++, C#, Visual Basic, Delphi or LabVIEW under Windows or Linux operating systems. If a PLC is used as host, implementations of the TML_LIB observing the IEC-61131 standard are available for Siemens, B&R and Omron PLCs.

iPOS3602 STARTER KIT

Complete evaluation packages for the iPOS3602 drives, containing the servodrive, motor, I/O board, EasyMotion Studio software, that are supported by a collection of application notes and documentation.

iPOS3602 INTELLIGENT SERVO DRIVES

Electrical Specifications

Maximum DC supply voltage: motor and logic	36V
Maximum continuous current	2A
Peak current (2.4 sec. max.)	3.2A
Nominal switching frequency	20-60kHz
Operating ambient temperature	0°C-40°C
