¹Operating temperature at higher temperatures is possible with reduced current and power ratings ² iPOS4815 can be operated in vacuum (no altitude restriction), but at altitudes over 2,500m, current and power rating are reduced due to thermal dissination efficiency. ³ In case of forced cooling (conduction or ventilation) the spacing requirements may drop substantially down to zero as long as the ambient temperature is kept below the maximum onerating limit

¹ Encoder2 differential input pins have internal 120Ω termination resistors connected across ² For many applications, a 120Ω termination resistor should be connected across SIN+ to SIN-, and across COS+ to COS- Please consult the feedback device datasheet for confirmation

³ "FS" stands for "Full Scale"

across COS+ to	COS Please consult the feedback device	datasheet for confirmation.
