ROOF

The world of work and office furniture is changing fast with globalisation. The demand for more flexibility in design is on the rise. New working concepts such as home offices and shared spaces are becoming increasingly common. The increase in importance of creative knowledge-based work also means that for companies the creation of practical yet functional performance spaces is an economic factor of enormous importance. These changes mean new challenges for the space in which we work.

ROOF is a free-standing cubic design with a room-within-a-room concept. The modular system is flexible, adaptable, mobile and space saving. Set-up is quick and works without a floor panel. This means that ROOF can be easily installed onto any floor surface, allowing it to fit seamlessly into its surroundings.

Aesthetic looking with its minimalist design, ROOF is versatile in its application possibilities, ease of modification and can be adapted to changing office structures and new room layouts. It offers infinite possibilities in the zoning of workplaces which makes it ideal for interviews, meetings and discussions. ROOF-Optimize your space.

ROOF

Terms like open spaces, co-working and smart working have long since entered our vocabulary for contemporary office design. Office furniture manufacturers have recognised this trend and are now offering multiple solutions and products to address the increased desire for flexibility in the work place.

With the understanding of today's dynamic workplace, both work styles as well as office space layout have evolved. ROOF is designed for higher efficiency, productivity and innovation. Space saving, aesthetically pleasing and mobile, it serves as an ideal workplace for various activities such as meetings, interviews and discussions.

ROOF offers an easy to install and variably adaptable room-in-room design with high quality technological compatibility for the office of tomorrow. With exterior panels upholstered in fabric, its superior sound dampening properties provides for better undisturbed communication. Contemporary in design, it is a space saver which maximises the potential of any work space. Utilise your space with ROOF, an ideal work pod for higher efficiency, productivity and innovation. A new trend of workplace design awaits.

ROOF

In need of privacy and zero interference during your meeting even when in a limited space? That's where ROOF comes in handy! ROOF provides not only efficiency, but also a high level of security and privacy. Now, with ROOF, all communications can be kept discrete and confidential, even with limited spacing.

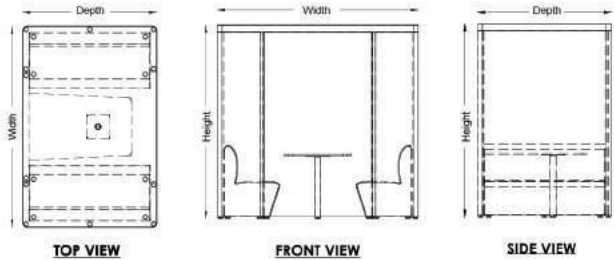

ROOF

ROOF is a movable conference room. It is a flexible and comfy working space that is able to fulfill your working needs. Limited space? No worries, ROOF is there to save the day!
