

## Tow Tractor

# P40 C B | P40 C | P60 C 

Capacity 4.0 t, 6.0 t | Series 4595

## Dynamic tower

$\rightarrow$ High maneuverability facilitates use in confined spaces
$\rightarrow$ Powerful motor ensures high tractive power and top speed
$\rightarrow$ Large selection of trailer couplings for different trailer types
$\rightarrow$ Special vehicle design allows optimum visibility of trailer and load
$\rightarrow$ Sprung operator's platform protects against shocks and vibrations
$\rightarrow$ Height-adjustable Linde steering wheel provides intuitive and precise control

## TECHNICAL DATA (According to vDI 2198)

| n <br> $\stackrel{y}{\square}$ <br> 0 | 8.1 | Type of drive unit |  | AC control | AC control | AC control |
|  | 10.7 | Sound level at driver's ear | ( $\mathrm{dB}(\mathrm{A})$ ) | < 70 | < 70 | < 70 |

1) With tray 4 Pz or $\mathrm{Li}-\mathrm{ON}+114 \mathrm{~mm}$
2) With optional ground clearance $\mathrm{m} 2=100 \mathrm{~mm}+50 \mathrm{~mm}$ 3) Optional equipment
3) With optional equipment fully suspended operator compartment only
4) With tiller adjustment option, h14 setting range $=+89 \mathrm{~mm},-19 \mathrm{~mm}$
5) Without coupling/ with three level coupling
6) With Li-ION battery the value is 1750 N for P40 C and P60 C; for P40 C B with Li-ION battery and any different combination of forces and time, please contact your sales representative

## TOW DIAGRAM

Speed (km/h) - Permissible distance km

Speed (km/h) - Permissible distance km

## P40 C B

The example shown illustrates

| A tractor towing | 2 t |
| :--- | :--- |
| operating on a ramp of | $4 \%$ |
| maximum travelling speed reachable | $5.7 \mathrm{~km} / \mathrm{h}$ |
| lenght of ramp | 3.9 km |

It is recommended that self braked trailers be used when the railer weight is more than 2.5 t and for all trailer loads when driving on upward / downward inclines.

## P40 C - P60 C

The example shown illustrates

A tractor towing $2 t$
operating on a ramp of
maximum travelling speed reachable
lenght of ramp

$$
\begin{aligned}
& 2 \mathrm{t} \\
& 4 \% \\
& 6.2 \mathrm{~km} / \mathrm{h}
\end{aligned}
$$

$$
3.8 \text { km }
$$

It is recommended that self braked trailers be used when the railer weight is more than 2.5 t and for all trailer loads when driving on upward / downward inclines.

|  | Li-ION 24 V Charger | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |

## CHARACTERISTICS

Linde BlueSpot ${ }^{T M}$ and lighting package

Comfortable operator compartment

Intuitive Linde steering wheel

Robust chassis

## Safety

$\rightarrow$ The body and limbs of the driver always remain within the protective vehicle contours
$\rightarrow$ Rugged bumper for collision protection
$\rightarrow$ Vehicle automatically reduces speed when cornering
$\rightarrow$ Access control prevents unauthorized access to the vehicle
$\rightarrow$ Comprehensive, optional lighting systems improve driver visibility and vehicle visibility

## Ergonomics

$\rightarrow$ Adjustable backrest, foldable seat and plenty of legroom for fatigue-free work
$\rightarrow$ Individually adjustable Linde steering wheel with intuitive controls ensures maximum driver comfort and precise control of the vehicle
$\rightarrow$ Full-suspension driver's platform protects against shocks and vibrations
$\rightarrow$ Wide entry with low step height protects the driver's strength
$\rightarrow$ Spacious storage compartments facilitate the storage of work utensils

## Handling

$\rightarrow$ Powerful, low-maintenance motor for tractive effort and high top speed
$\rightarrow$ Good visibility of trailer and load facilitates load transport
$\rightarrow$ Large selection of trailer couplings for different trailer types
$\rightarrow$ Short turning radius optimally supports maneuvering in confined spaces
$\rightarrow$ In addition to lead-acid batteries and lithium-ion batteries are optionally available as energy sources

## Service

$\rightarrow$ Low maintenance design for high vehicle availability
$\rightarrow$ Relubrication of the drive wheel only necessary after 10000 operating hours
$\rightarrow$ Easy access to all major vehicle components simplifies maintenance
$\rightarrow$ Clear cable routing reduces the duration of maintenance work
