

Pneumatic Manipulator **POSIFIL PF** with double cable

The POSIFIL Manipulator, equipped with electrical turbine vacuum pump, allows the handling of paper and plastic bags, cardboard boxes, rubber bales, drums etc. using standard or customized suction cups according to the applications.

The technical features of Posifil remain unchanged and it is manufactured in column mounted version and fixed overhead version.

WEIGHT
CAPACITY
50 Kg

RADIUS
5000 mm

PRESSURE
0.7-0.8 Mpa

VERTICAL LIFT
1800 mm

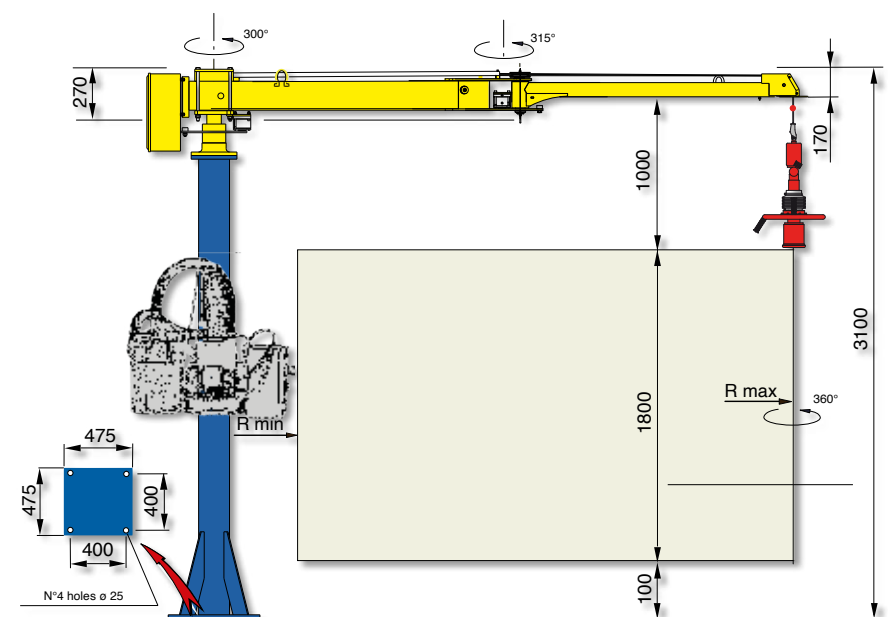

POWER SUPPLY
415 V 50 Hz
3 Phase IP 55

VERSIONS
COLUMN
FIXED
OVERHEAD

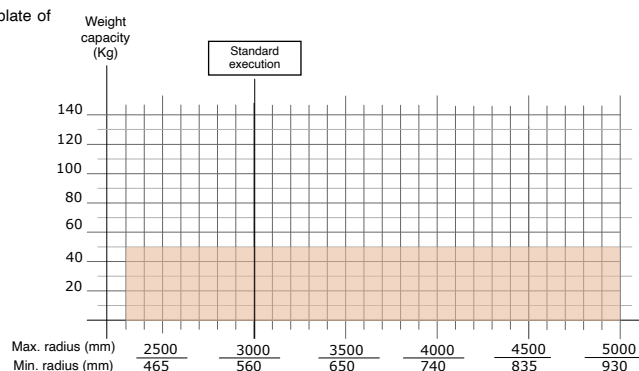

POSIFIL[®] - PF BAGS

POSIFIL BAGS - PF

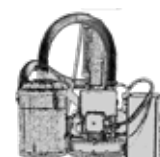

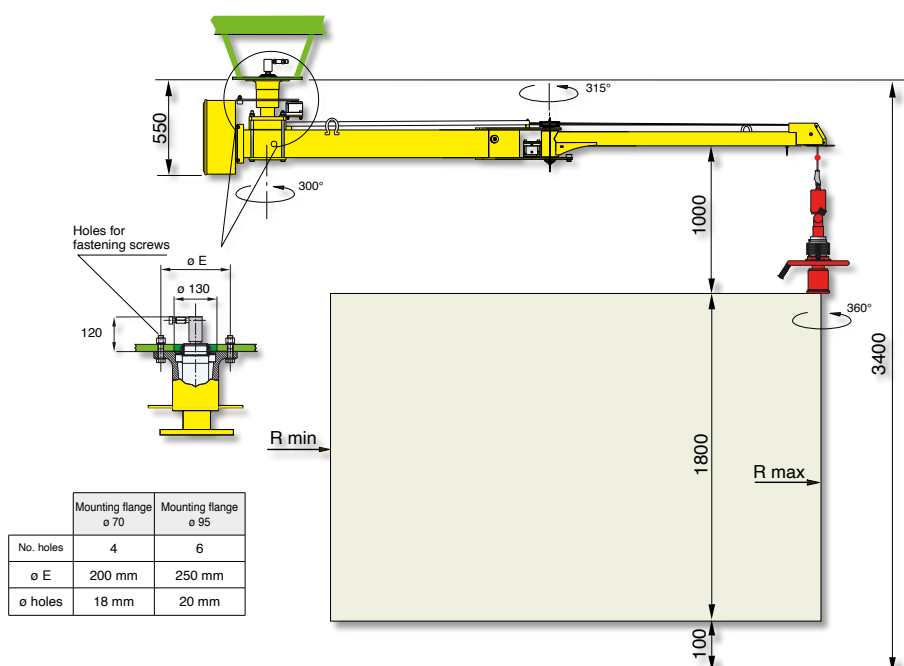

Posifil column mounted - PFC

Structural versions: column mounted on fixed base-plate, autostable base-plate of our supply properly dimensioned.

Posifil fixed overhead - PFF

The electrical turbine vacuum pump, with relative control panel and, if necessary, with filtering system, can be placed separately from the Manipulator, in a dedicated area, considering a distance of no more than 10 meters.

Air supply: dry and oil-free compressed air min. constant 0.7÷0.8 MPa
