# JDN HOISTS FOR USE IN THE TOUGH-EST CONDITIONS

## JDN HOISTS FOR USE IN THE TOUGHEST CONDITIONS

### **JDN SUBSEA HOISTS**

#### THE ULTIMATE TOOL FOR EVERY **PROFESSIONAL DIVER**

The JDN PROFI Subsea series is available with air or hydraulic drives. As well as a sensitive control system, the PROFI hoists are equipped with an overload protection. PROFI subsea hoists are a versatile and indispensable tool for professional divers and are suitable for horizontal work as well as for oblique pulling.

#### **ADVANTAGES**

- Air or hydraulic drive
- Infinitely variable speeds can be regulated sensitively
- With overload protection
- Very versatile, also suitable for horizontal and oblique pulling thanks to hook suspension

PROFI 6TI Subsea

## JDN CRYOGENIC HOISTS

#### NOT ONLY SUITABLE FOR BOP HANDLING IN ARCTIC AREAS:

The temperature range of standard JDN hoists is -20°C to +70°C. JDN has developed hydraulic hoists for applications at temperatures as low as minus 45°C, such as BOP handling in arctic areas. To enable these hydraulic drives to be used under such extreme temperatures, they are fitted with a device that pre-heats the drives to a temperature of -25°C before being operated. This is achieved directly by means of the standard hydraulic supply. JDN hydraulic hoists are designed to be operated with low-temperature hydraulic fluids and can be operated efficiently at temperatures from -45°C to +40°C.

#### **ADVANTAGES**

- Application range -45°C to +40°C
- Hydraulic drive
- Easy starting thanks to pre-heating device for the drives
- Operation with low-temperature hydraulic fluid
- Tested under real conditions and in use in Siberia
