## Form, fill and seal lines

Servo-driven form, fill and seal machine for producing various sizes of packaging units for the dairy and food industry. Very quiet and smooth operation at maximum speed. Stainless-steel version, up to hygiene level Aseptic.

The FS 48 form, fill and seal machine has a modular design and offers a variety of different options to meet your individual requirements. The economic FFS line, in all stainless-steel version for CIP and SIP, has a maximum forming area of 520 x 330 mm. A format layout between 10 and 40 packs per cycle enables the production of 10,000 to 70,000 packs per hour. The discharge system is prepared for every type of packaging: round, oval, rectangular, or asymmetrical. The size of the forming area has been dimensioned so that a complete machine cycle can always be directly deposited onto a EUR-pallet in the box. The hygiene levels Clean, Ultra-Clean and Aseptic are available depending on the requirements.
