Type sheet

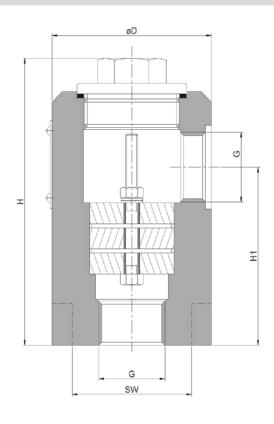

Uni-directional in-line detonation flame arrester KITO® Rd/C-Det4-IIA-...-1.2

Application

Detonation flame arrester for installation into pipes to protect containers and components against stable detonation of flammable liquids and gases. Tested and approved as detonation flame arrester type 4. Approved for all substances of explosion groups IIA1 to IIA with a maximum experimental safe gap (MESG) > 0.9 mm. An operating pressure of 1.2 bar abs. and an operating temperature of 60 °C must not be exceeded. Positioning should be as close as possible to the protected object; it is only allowed to connect pipes with the same or a smaller diameter than the diameter (G) of the device. The installation of the detonation flame arrester into horizontal and vertical pipes is permissible.

Dimensions (mm)

thread	D	н	Н1	sw	~kg
G ¹ / ₈ " G ¹ / ₄ " G ³ / ₈ " G ¹ / ₂ " G ³ / ₄ " G 1"	80	137	85	60	4.5

Weight refers to the standard design

Performance curves

Flow capacity V based on air of a density $p = 1.29 \text{ kg/m}^3$ at T = 273 K and atmospheric pressure p = 1.013 mbar. For other gases the flow can be approximately calculated by

$$\overset{\cdot}{\mathbf{V}} = \overset{\cdot}{\mathbf{V}}_{b} \cdot \sqrt{\frac{\rho_{b}}{1.29}} \ or \ \overset{\cdot}{\mathbf{V}}_{b} = \overset{\cdot}{\mathbf{V}} \cdot \sqrt{\frac{1.29}{\rho_{b}}}$$
