## Type sheet

Deflagration and endurance burning proof pressure relief device KITO ${ }^{\circledR}$ DE/cont. 20

## Application

Endurance burning proof pressure relief device for portable tanks (GGVSE/ADR and GGVSE/RID) for the transport of flammable liquids and gases of explosion group IIB3 (MESG $\geq 0.65 \mathrm{~mm}$ ) with exception of carbon disulphide. An operating temperature of $60^{\circ} \mathrm{C}$ must not be exceeded. For safe tank pressure relief to the atmosphere before opening of the tank caps or connected lines. A pipe connection instead of the cap is not allowed.

Dimensions (mm)

| DIN | ASME | $\mathbf{D}$ | $\mathbf{D 1}$ | $\mathbf{H}$ | $\mathbf{L}$ | $\mathbf{k g}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{4 0 ~ P N ~ 4 0 ~}$ | $\mathbf{1} 1 / 24$ | 150 | 20 | 111 | 160 | 1.7 |

## Example for order

KITO ${ }^{\circledR}$ DE/cont. 20 DN 40 PN 40
(design with flange connection DN 40 PN 40 type A)
Type examination certificate to EN ISO 16852 and ( $€$-marking in accordance to ATEX-Directive 2014/34/EU

| gaskets | PTFE |  |
| bolts | A4 |  |
| screw cap | stainless steel mat. no. 1.4571 | drilled to ASME B16.5 Class 150 RF |
| flange connection | drilled to EN 1092-1 type A |  |

## Performance curves

Flow capacity V based on air of a density $\rho=1.29 \mathrm{~kg} / \mathrm{m}^{3}$ at $\mathrm{T}=273 \mathrm{~K}$ and atmospheric pressure $\mathrm{p}=1.013 \mathrm{mbar}$. For other gases the flow can be approximately calculated by

$$
\dot{\mathrm{V}}=\dot{\mathrm{V}}_{\mathrm{b}} \cdot \sqrt{\frac{\rho_{\mathrm{b}}}{1.29}} \text { or } \quad \dot{\mathrm{V}}_{\mathrm{b}}=\dot{\mathrm{V}} \cdot \sqrt{\frac{1.29}{\rho_{\mathrm{b}}}}
$$
