## TANK AGITATORS

Trendsetting agitator technology

Homogenize, suspend, disperse

## VISCO JET® agitator systems

### AGITATE SLOWLY – WITH FAST RESULTS

For successful agitation, it's the technique that matters, not the speed. VISCO JET® agitators prove this in no uncertain terms. Their particular strength lies in the special geometry of the conical mixing elements: with its cleverly-designed spatial and angular relationships, the agitator ensures an optimum mixing process in a very short time, even at the lowest circumferential speeds.

VISCO JET® agitator technology sets standards and proves itself in a very wide range of industries around the world. It is flexible, reduces costs and guarantees high-quality results.

VISCO JET®

## VJ500

### Tank agitator for installation from above

- For fixed, stationary storage or production tanks
- Volume from 10 litres to 1.5 million litres
- For installation from above
- Can be used with any container shape and base
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available
- Sealing: from simple sealing ring to mechanical seal

## VJ510

### Tank agitator for horizontal tanks

- Tank agitator for fixed or movable horizontal tanks (on a truck or train)
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available
- Sealing: from simple sealing ring to mechanical seal

## VJ520

### Tank agitator for stainless steel containers

- Agitator for stainless steel transport containers with covers
- Agitator firmly bolted to the cover
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available
- Lifting bracket for easy hoisting with lifting gear

**Your special requirements are our standard!**

# VJ600

## Tank agitator for installation from below

- Tank agitator for fixed, stationary storage or production tanks
- Volume from 10 litres to 1.5 million litres
- For installation from below, including sealing
- Can be used with any container shape and base
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available

# VJ610

## Sub-level agitator with magnetic technologie

- Tank agitator for fixed, stationary storage or production tanks
- Leak-free power transmission, drive technology with no product contact
- Volume-independent
- Can be used with any container shape and base
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available

# VJ620

## Tank agitator for lateral mounting

- Tank agitator for fixed, stationary storage or production tanks
- Volume from 10 litres to 1.5 million litres
- Lateral mounting with sealing technology
- Can be used with any tank shape and base
- Customised to suit your specific requirements
- Different VISCO JET® mixing elements for low, medium and high-viscosity media
- Various drives available

All Tank Agitators  
available as  
ATEX version 

## VISCO JET® agitator systems

### CAUSE...

Accelerated laminar flows and the reverse turbulence created by dynamic pressure interact at the cone entrance as the agitator rotates, generating the high-momentum mixing movements so typical of VISCO JET® technology.

### ...AND EFFECT

Extremely material-friendly and highly efficient agitator processes with very little energy expenditure are now possible. This applies particularly to tanks with very high volumes.
